STATEMENT ON REACH AND SVHC

The REACH Regulation (EC) No. 1907/2006 of the European Parliament and of the Council governs the registration, evaluation, authorization, and restriction of chemical substances.

The Regulation entered into force in the European Union (EU) in 2007 and aims to ensure the highest possible level of protection for the environment as well as human health.

Pursuant to Article 33 of the REACH Regulation (EC) No. 1907/2006, producers of articles must provide their customers with sufficient information for the safe use of their product, including at a minimum the name of the substance used, provided that an article (or part thereof) contains a mass concentration of more than 0.1% (w/w) of one or more substances of very high concern (SVHCs) on the Candidate List of the European Chemicals Agency (ECHA).

Hereby, we confirm that our business units "Printed Circuit Board Trading (PCB)" and "HMI Systems & Solutions" comply with their obligations under the REACH regulation. However, we would like to point out that both business units are classified as so-called "downstream users", and that our products are considered "articles" that, when used as intended, neither release hazardous substances nor pose a risk to health or the environment. Therefore, they are not subject to registration.

To the extent that these articles contain substances (e.g., in base materials, solder mask, or surface coatings of printed circuit boards; SVHCs in adhesives, films, or plastics), we ensure that our suppliers comply with their REACH obligations, particularly regarding registration and, where applicable, authorization, and that they notify us in the event of any relevant changes.

Based on current information and supplier data, the products we supply do not contain any substances on the ECHA Candidate List in concentrations exceeding 0.1% by weight (w/w).

Nonetheless, as per current knowledge, individual components of our products may contain substances from the applicable ECHA Candidate List in concentrations exceeding 0.1 % (w/w).

Possible substance groups / applications (exemplary):

- Phthalates (e.g., in plastics, cable sheathing)
- Lead in solder joints or special glasses (subject to applicable exemptions)
- Flame retardants in plastics
- Metal alloys containing SVHC-relevant components
- Photoinitiators in paints and coatings

This particularly applies to materials sourced from third-party suppliers.

The permitted uses and exemptions under REACH apply to all substances concerned.

All substances currently identified as SVHCs can be accessed via the following link to the Candidate List of the European Chemicals Agency (ECHA):

<https://echa.europa.eu/de/candidate-list-table>

As a rule, additional substances are added to the list twice a year.

We assure you that we closely monitor, continuously review and evaluate updates to REACH requirements, particularly additions to the Candidate List or changes in the supply chain.

As soon as information becomes available, indicating that listed substances are present in products we supply at concentrations exceeding those specified in the REACH Regulation, we will, of course, inform our customers proactively and – where necessary – provide product-specific information and guidance on safe use.

We guarantee that we are continuously working to minimize the use of SVHC substances in our products or to replace them with suitable alternatives.

Information on specific products will be provided upon request.

Pierre Lohrber

Owner & CEO

Disclaimer: The information regarding the material ingredients provided by EYTRA GmbH is based on data from our suppliers. EYTRA GmbH therefore cannot guarantee the accuracy or completeness of all information. Consequently, this statement is based on our current knowledge. We assume no liability or warranty for facts beyond our knowledge and control. The information may be used by interested parties as a reference for their product conformity assessment.

*We are supplying
customized
HMI & PCB solutions
to the world
as the best partner
in quality & service*
