STATEMENT ON ROHS

The Restriction of Hazardous Substances Directive (RoHS, 2002/95/EC), adopted by the European Union in 2002, restricts the use of hazardous substances in electrical and electronic equipment (EEE) to protect the environment and public health, primarily during manufacturing, use, and disposal.

Originally, RoHS restricted six hazardous substances. With the updated versions of the directive, also known as RoHS 2 (2011/65/EU) and RoHS 3 (2015/863/EU), the list of restricted substances was expanded to ten hazardous substances:

- Lead (Pb)
- Cadmium (Cd)
- Mercury (Hg)
- Hexavalent chromium (Cr(VI))
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ethers (PBDE)
- Di(2-ethylhexyl) phthalate (DEHP)
- Butyl benzyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Di-isobutyl phthalate (DIBP)

We herein declare that the electrical and electronic products placed on the market by our business units "Printed Circuit Board (PCB) Trading" and "HMI Systems & Solutions" meet the requirements of Directive 2011/65/EU (RoHS) on the restriction of the use of certain hazardous substances in electrical and electronic equipment, including Delegated Directive (EU) 2015/863.

The concentrations of the substances listed in Annex II of Directive 2011/65/EU (including lead, mercury, cadmium, hexavalent chromium, PBB, PBDE, as well as DEHP, BBP, DBP, and DIBP) do not exceed the permissible maximum levels in homogeneous materials, provided that no relevant exemptions under Annex III/IV are invoked.

This applies both to the base materials used by suppliers to the "PCB" business unit (e.g., FR4 materials), solder resist coatings, and PCB surfaces (e.g., chemical tin, chemical Ni/Au, lead-free HAL), as well as for all assemblies and components used within the "HMI Systems & Solutions" business unit, such as displays, touch sensors, LEDs, cables, connectors, housing materials, and adhesive systems.

RoHS compliance is monitored through supplier declarations, material-specific specifications, and – where necessary – random inspections, and is integrated into EVYTRA GmbH's quality management system. This statement applies to all products designated as RoHS-compliant by default by both business units and will be updated in the event of changes to the legal framework, the product portfolio, or the supply chain.

As soon as we obtain information that products, we supply contain listed substances in concentrations exceeding those specified in the RoHS Directive, we will, of course, inform our customers proactively and – where necessary – provide product-specific information and guidance on safe use.

**We are supplying
customized
HMI & PCB solutions
to the world
as the best partner
in quality & service**
